

FCC should NOT implement any proposal that would lessen Indiana's Telephone Privacy Law (Ind,TPL) protections. The Ind. TPL has improved our family life style with No intruptions at dinner or when we are doing projects at home. The Ind. TPL has improved our quality time at home. We use to receive at least 20 to 40 calls a week now we may only receive 1 a month. Thank goodness!

If we are interested in buy something we will contact that business ourselves. Just because we have done business with someone once, this does not give them the right to invade our privacy and disrupt our family time.
